My dad is a truck driver and he relies on XM radio for weather updates and road conditions. This is something he pays for and it shouldn't be taken away. It helps keep him safe and I appreciate that. XM radio shouldn't be taken away just because someone else's business is drowning. This is a world of technology and my advice is get with it or leave it alone but don't try to reverse it or take it away. They won't win.
